Professional Summary

Senior engineer with 10+ years taking products from problem to production, from Coinbase's capital formation platform (live in 2 months) to LLM agent systems built end to end: Claude, MCP, RAG, NLP routing, and evals.

Experience

Coinbase · Senior Software Engineer

January 2022 – Present · Remote

Capital Formation

- Led a 10-engineer team to launch a new capital formation platform supporting IPOs alongside token sales.
- Set technical direction and went to production in 2 months, raising over \$250M for the first issuer.

GraphQL Federation

- Designed a federated GraphQL architecture replacing the monolith; led the first subgraph and mentored teams.

INTX Exchange

- Planned, built, and launched perpetual futures — a net-new asset type for retail advanced trading.
- Owned monitoring, reliability, and incident response for the global rollout — \$1B+ traded in year one.

Nike Valiant Labs · Sr. Software Engineer III

June 2018 – December 2021 · Portland, OR / Remote

- Built an early iteration of Nike By You — a creator sneaker marketplace, 500k+ pairs sold — on Lambda and ECS.

Projects

Jarvis Cloud · Voice agent on AWS · 2026

- Voice agent on Nova 2 Sonic speech-to-speech, delegating deeper work to Claude agents on Bedrock via tool use.
- MCP client plus Home Assistant, Gmail, Calendar, S3 Vectors RAG, and Claude Code jobs, under a spend cap.

Assistant · Local-first agent in Rust · 2026

- Rule-based NLP triage, then a ModernBERT classifier routes each turn — code, not the model, decides the path.
- Planner → researcher → reporter agents, human approval before destructive steps, and labeled routing evals.

LLM Gateway & Homelab Platform · 2026

- LiteLLM gateway: local llama.cpp first, Claude on Bedrock as fallback, per-consumer keys and spend tracking.
- Talos Kubernetes on Proxmox via Terraform and Argo CD, a shared GPU node, and CI-only tenant deploys.

Skills

AI & AGENTS

Claude & OpenAI APIs Claude Agent SDK Claude Code MCP Agent orchestration RAG Evals

NLP

Intent classification (ModernBERT) Semantic analysis & search Embeddings Speech (STT/TTS)

STACK

TypeScript Python Go Rust React Node.js GraphQL Postgres

CLOUD & INFRA

AWS Bedrock LiteLLM llama.cpp Kubernetes Argo CD Terraform Proxmox

Education

Rochester Institute of Technology · B.S. Computer Science · Rochester, NY
